

A NEW REALM OF  
**POSSIBILITIES**

TURN KEY CEMENT PLANTS AND OTHER  
MINERAL PROCESSING PLANTS

RAW MATERIAL PROCESS SYSTEM

LIME CALCINATION SYSTEM

CEMENT PLANT CORE EQUIPMENT

MATERIAL HANDLING EQUIPMENT

CRUSHING & SCREENING EQUIPMENT

MATERIAL FEEDING EQUIPMENT

VALVES & GATES

## WHO WE ARE

Founded in 1979, Movers (India) combines innovative technical solutions with precision equipment manufacturing, redefining engineering consultancy with an annual turnover of \$6-8 million.

**Expertise:** Innovative technical solutions & precision equipment manufacturing.

---

### Our Approach

Client-Centric: Long-term relationships & tailored solutions.

Engineering Excellence: Cutting-edge CAD tools for efficient, accurate analysis.

Experienced Team: Principal engineers with 20+ years of hands-on expertise.

---

### Our Vision

Deliver high-quality, impactful engineering projects that reflect clients' values with precision and innovation.

# Our Mission

## **Exceed Expectations:**

Deliver exceptional service, flexibility, and value to optimize functionality and efficiency.

**Expert Team:** Hands-on expertise & functional know-how to ensure professional and effective solutions.

**Proven Success:** Track record of managing multi-location operations and meeting business goals on time and within budget.

**Strategic Partner:** Comprehensive support from concept to implementation, ensuring consistency and integrity.

# Our Expertise

## Design & Technical Excellence

We ensure project integrity and consistency through meticulous design and close collaboration with clients. Our team creates inspiring and unique manufacturing setups by understanding client demographics and psychology.

## Technical Prowess

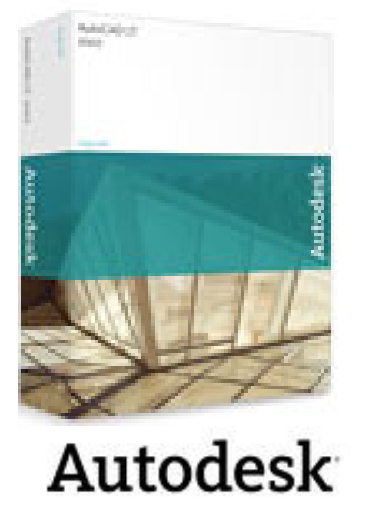

Our technical director brings cutting-edge insights, advising on major installations like:

- Cement Plants
- Mineral Grinding Units
- Clinker Grinding Units
- Waste-to-Energy Plants

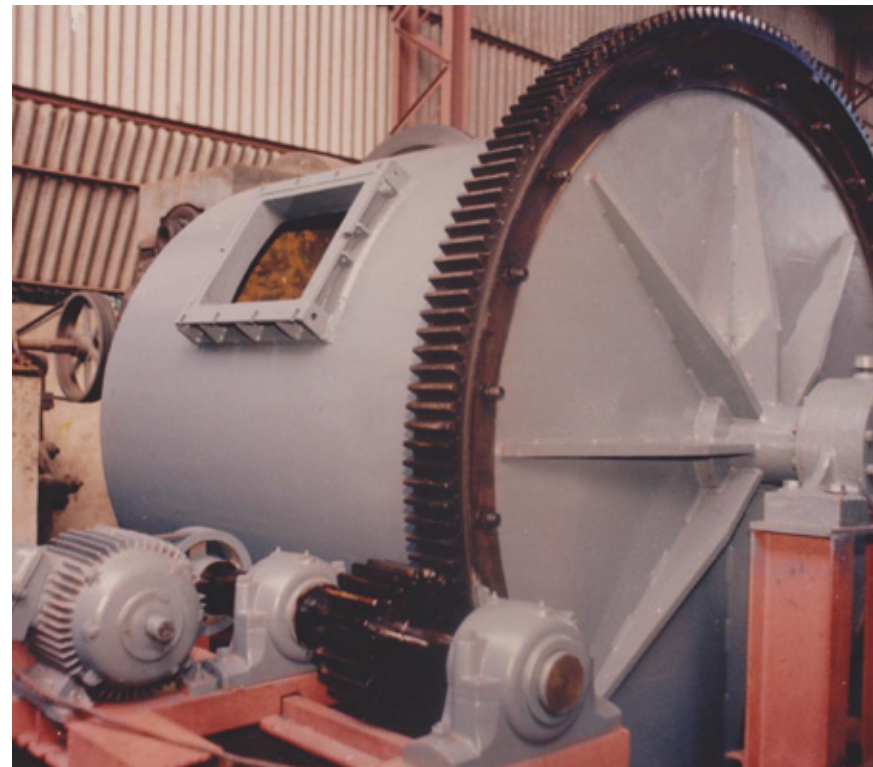

## Tools & Innovation

Powered by advanced design tools like AutoCAD, IronCAD, CADian, and VeriCAD.

Seamless integration of design and manufacturing ensures excellence from concept to creation.

# Our Resources

## Our Manufacturing Units

01

Our Manufacturing facility M/s. Bulkmov Engineering Private Ltd., is situated in Peenya Industrial Area, Bangalore, where we have facilities for fabrication, structural work, heat treatment, machining, gear hobbing etc.

02

We have quality control department comprising of qualified personnel for inspection of items during and after manufacture.

03

We have a good team of Engineers to design, plan and execute all types of jobs.

---

# Testing Facilities Available At Our Units

Leak test & D.P. test on weld joints.

Radiography tests on welds can be arranged whenever needed.

Material analysis can be arranged whenever needed.

Heat treatments can be arranged wherever necessary.

Static balancing and dynamic balancing for critical items can be arranged.

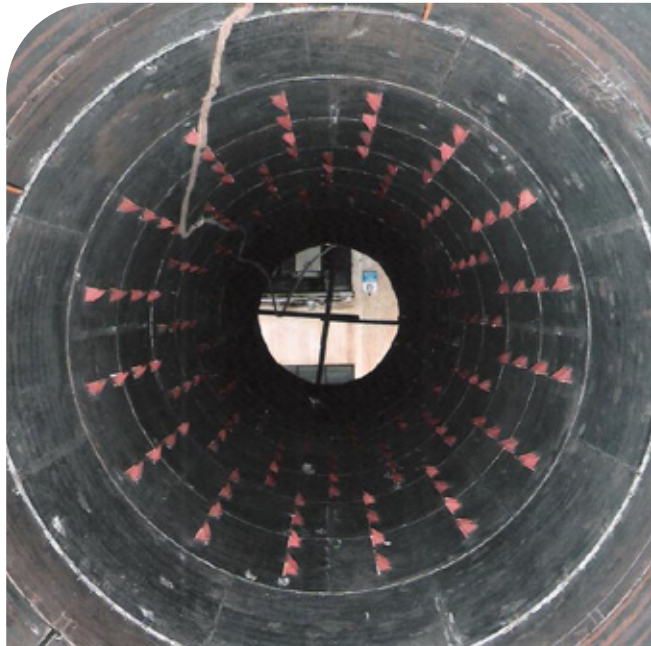

All meters and meggering instruments available for testing any electrical equipment.

Spray painting facility available.

We have precision instruments and gauges for checking the quality of machined components.

# HOW DID WE DO?

## ***Local Presence & Support***

We're always where the customer needs us, with a strong sales and support force.

## ***Innovative R&D***

A unique platform that drives continuous development and innovation.

## ***Proven Expertise***

A solid track record in cement production process development and operation.

## ***In-depth Specialization:***

Our product knowledge and specialization are second to none.

## ***End-to-End Control***

We don't outsource. Every step of the manufacturing process is monitored by our in-house experts. Our engineering staff ensures precise manufacturing and rigorous testing of all equipment.

## ***Unmatched After-Sales Support:***

Our in-depth knowledge and expertise provide unparalleled post-purchase support, always offering thoughtful and substantial solutions to meet your needs.

## ***Performance in Extreme Environments:***

Our solutions leverage the latest technology to perform under the most challenging conditions, meeting critical precision control needs.

## ***Our People:***

Our greatest asset—well-trained, skilled in both technical and interpersonal areas, with years of experience and unique expertise.

## ***Flexibility***

Seamlessly integrating with clients, from small grinding units to large cement manufacturing corporations, our flexibility is a key strength.

## ***Certifications:***

All our drawings are certified 100% error-free, thanks to our expert error correction and scrutiny system.

## ***Proven Experience:***

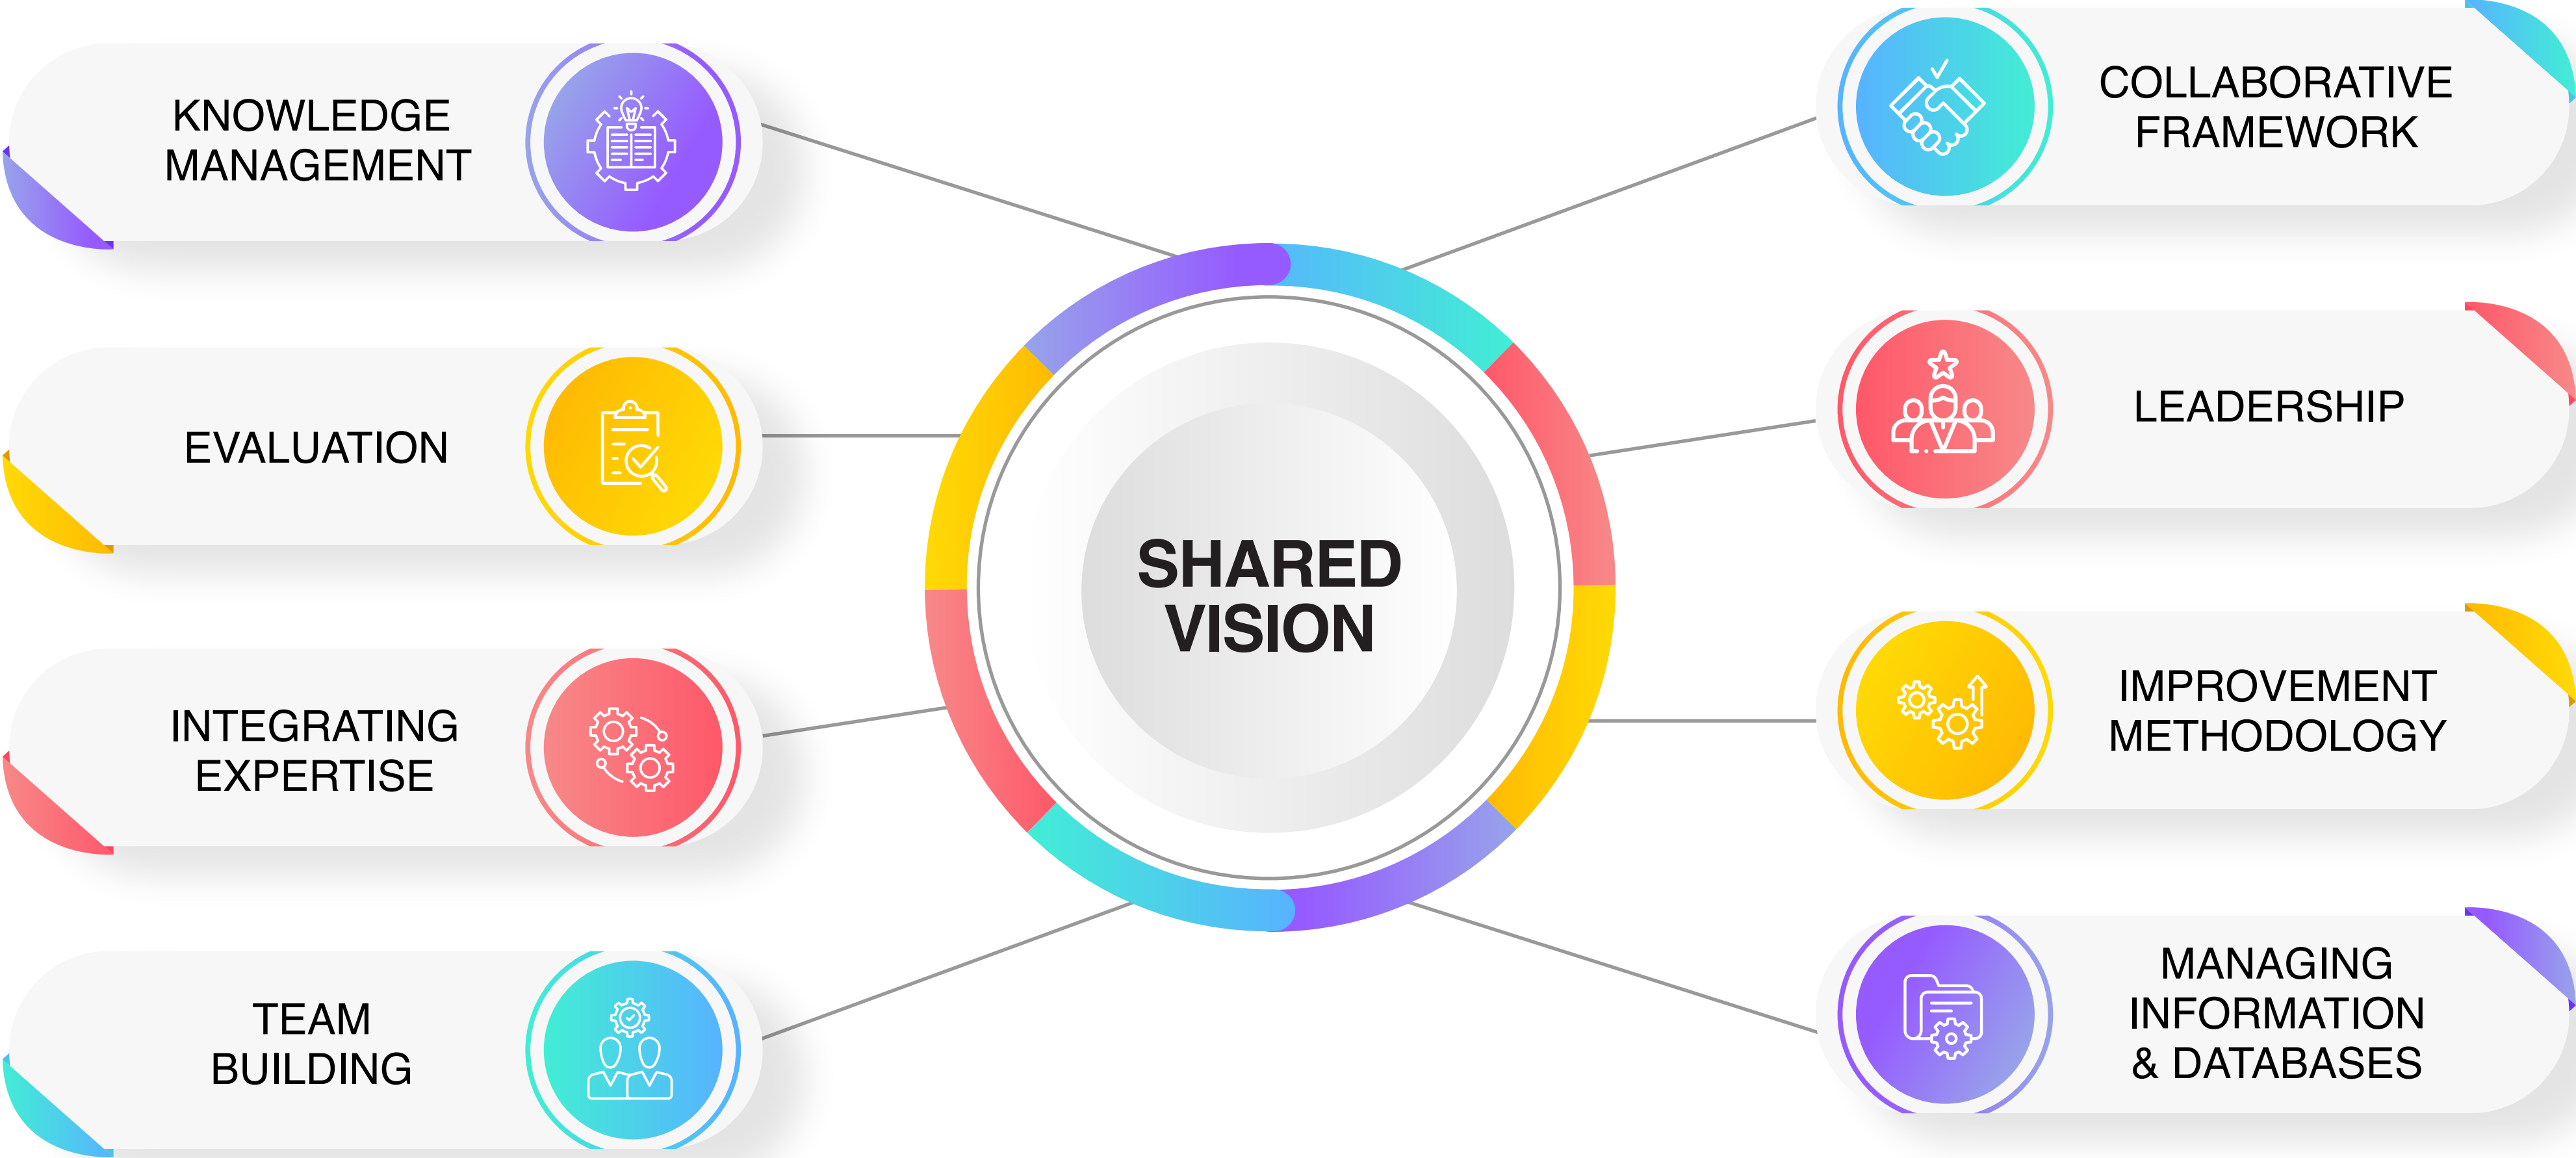

With over 60 clients from diverse sectors, we bring a leading edge over competitors.

## ***Cost-effective Solutions:***

Leveraging years of industry experience, we control costs and pass these savings onto our clients.

## ***Commitment to Technology:***

Constant investment in cutting-edge technology ensures we stay ahead of the curve and provide superior service to our clients.
